

Nathan da Silva dos Anjos

Systems & Automation Analyst | Backend Developer

Rio de Janeiro, RJ, Brazil • +55 (21) 98667-4953 • nathabe30@gmail.com • [LinkedIn](#) • [GitHub](#)

PROFESSIONAL SUMMARY

IT Professional holding a Degree in Information Technology Management and currently pursuing a Degree in Systems Analysis and Development. Solid experience in L1/L2 Technical Support, Cloud Computing, and Infrastructure, managing environments in Google Workspace, Microsoft Azure, and AWS (S3 and EC2), as well as network, server, and Active Directory administration. Hands-on backend development experience in the BFD training project (Softex PE/UFF), focusing on RESTful API creation and automation. Knowledge of JavaScript/TypeScript, Node.js, Python, N8N, and databases.

PROFESSIONAL EXPERIENCE

3AM IT Services | TRF2 — Technical Support Analyst

May 2026 – Present

Rio de Janeiro, RJ, Brazil

- Diagnoses, manages, and resolves L1/L2 incidents, providing remote technical support for hardware, software, and connectivity issues.
- Configures and supports Virtual Private Networks (VPNs) for secure access to court systems; provides real-time technical support for virtual and hybrid hearings.
- Logs, triages, and monitors service requests using GLPI; authors technical articles, standard operating procedures, and knowledge base tutorials.
- Supports compliance with LGPD guidelines in handling tickets and user data.

Trinity TI — L2 Support Analyst

Feb 2023 – Nov 2025

Rio de Janeiro, RJ, Brazil

- Managed Google Workspace and Microsoft Azure cloud environments, as well as Active Directory servers.
- Investigated and resolved critical bugs in collaboration with the L3 development team.
- Worked on information security and LGPD compliance assessments; created automation scripts to optimize routines and documented technical procedures.

FEATURED PROJECTS

AI CSS Generator (Llama-3) — Full Stack Project ([GitHub](#))

2024 – Present

- Built a web tool integrated with the Groq API for automated CSS code generation and integrated LLMs to automate user interface creation and improve UX.

Automations with N8N — Artificial Intelligence ([GitHub](#))

2024

- Developed intelligent workflows using N8N for business process automation.
